Career Portal – Privacy Notices & Localization Defects

Defect Overview & Reproduction

Independent QA review of the public - facing [redacted] Career Portal. Findings are based on observed application behavior and supporting screenshots

Title / ID What, where and trigger	[redacted] [Registration] Privacy Notice Content Missing or Invalid Across TR/EN
Reporter / date Who observed it and when?	Bora Koşalay - 08 October 2026
Environment URL, build, browser, OS, device, role	Environment: Production (Public Career Portal) URL: [redacted] Platform: Desktop OS: Windows 11 Browser: Brave v1.97.56 Languages Tested: Turkish (TR), English (EN) Authentication: Not required Build: Unknown
Steps to reproduce Exact starting data and actions	1. Navigate to the [redacted] Career Portal registration page. 2. Select Turkish (TR) as the interface language. 3. Open the "Aydınlatma Metni" dialog and observe its content. 4. Close the dialog and open the "Çalışan Adayı Açık Rıza Metni" dialog. 5. Observe the displayed content. 6. Switch the interface language to English (EN). 7. Open both information dialogs again. 8. Compare the displayed content between the Turkish and English versions.
Expected result Observable correct behavior	Both the Privacy Notice and Candidate Explicit Consent dialogs should display their respective complete and relevant information, allowing applicants to review the content before providing their declarations, regardless of the selected interface language.
Actual result	

Component	Turkish (TR)	English (EN)
Privacy Notice	Displays “test”	Empty content
Explicit Consent Notice	Displays “deneme"	Empty content

Impact Assessment & Supporting Evidence

This section documents the observed impact, suggested severity and priority, supporting evidence, and additional localization findings.

Report reference Same ID and title as page 1	[redacted] - Privacy Notice Content Missing or Invalid Across TR/EN
Impact / frequency Affected users and workaround	Both privacy-related dialogs display invalid or missing content in the tested Turkish and English interfaces. Applicants may be unable to review relevant privacy information before providing their declarations. Potential KVKK compliance implications require internal assessment. Reproduction frequency was not formally measured.
Severity / priority Critical, Major, Minor, Trivial / High, Medium, Low	Suggested Severity: Major (S2) Suggested Priority: High (P1) Reason: Missing privacy-related information in a public production registration flow.
Evidence Attachment names or accessible links	SS-01: Privacy Notice (TR) - "test" SS-02: Explicit Consent (TR) - "deneme" SS-03: Privacy Notice (EN) - Empty SS-04: Explicit Consent (EN) - Empty SS-05: Registration Form (EN) - Untranslated privacy-related labels See Appendix A - Supporting Evidence.
Technical details Optional console / network / request ID	Observed via the public registration interface using Brave on Windows 11. No application logs or network traces were collected. Backend behavior and root cause were not investigated.
Triage / retest Owner, status, build and outcome	Prepared for external submission. [redacted]
Related notes Dependencies / duplicate reports	Additional localization finding: When English is selected, the privacy-related checkbox descriptions and dialog titles remain in Turkish, while general registration labels appear in English. The intended localization requirements have not been verified.
